

# Weatherization Technology Program

- Installer
- Crew Chief
- Energy Auditor

The Central Georgia Technical College Weatherization Program was established to identify, train, and certify Central Georgia workers to complete high-quality energy reduction, conservation, and weatherization activities that will also reduce home owner utility costs.

## Skills mastered include:

- Understanding the major factors that contribute to weatherization deficiencies in a home and have the skills to correct those deficiencies
- Identification of strength and weakness in insulation and ventilation efficiency
- Application of weatherization concepts to your contracting or inspection business
- Mitigation of insulation defects with proper weatherization techniques
- Proper remediation of air leaks and insulation gaps in doors, windows, walls, basements, crawlspaces, attics, air ducts, etc.
- Techniques to market your services and expand your business
